Safety Specialist Internship

About the role

As a Workplace Health & Safety Intern, you will be a passionate advocate for creating and delivering safe yet efficient working environments. You must have excellent analytical, organizational and interpersonal skills, be an effective communicator, have a high sense of (internal) customer service and be able to work with cross-functional teams including Senior Management.

Key Responsibilities

- Familiarize and help with the organization and processes for new launches
- Assist the Safety New Build Manager and the Safety Engineer in delivering safety excellent processes and operations
- Support safety process systems through participation in planned inspections of buildings, machines and jobs for accident prevention
- Perform and update Risk Assessments and Job Hazard Analyses
- Analyse accident data and develop standards to ensure prevention of accidents

Duration/location

This internship runs for 3-6 months with flexible start dates between April-September 2025. Positions are available in **Witten (NW)**, Dortmund, Suelzetal (ST), Mönchengladbach, Achim, Horn-Bad Meinberg (NW), Gattendorf, Rheinberg, and Heidenheim An Der Brenz.

Who we are looking for

- Currently in your penultimate or final year and working towards a university degree in Engineering, Health & Safety or similar discipline
- Eligible to complete a full-time internship of 3-6 months.
- Highly proficient in both spoken and written English and German (Common European Framework of Reference C1).
- Analytical skills, preferably with advanced proficiency in Excel (e.g. macros, pivot tables, complex formulas)
